

Case TR 270

Compact Track Loader

Rubber Track Options

RT_3

RT_4

RT_44

RT_55

RT_3 C-Shaped

The c-shaped pattern provides more of an aggressive bite than the staggered pad. It has optimal floatation and traction with better results on hills or slopes.

RT_4 Staggered Block Pad

The staggered block pad design creates a highly versatile track with good balance and traction. The design also minimizes vibration by putting more rubber on the travelling surface which spreads the weight load while increasing floatation.

RT_44

This track is used when work demands driving long distances. Low vibration and noise. Exceptional for rider comfort.

RT_55

The block pad design creates a very versatile track with good balance and traction. It minimizes vibration by putting more rubber on the travelling surface, which spreads the weight load while increasing floatation.

RT_55

Check with your sales representative for more options.
