

Bobcat 325 & 328

Excavator

Rubber Track Options

RT_14

This staggered lug design provides good traction and added performance in mud and dirt applications. Due to having a larger contact pad with the ground, this track has reduced vibration and track noise.

RT_23 "K Style"

This zigzag pattern provides good traction with less vibration. Best use in areas where the surface demands a more aggressive track.

RT_53

This staggered tread pattern is more durable and aggressive when compared to the other tracks for the Bobcat 325 or 328.

Check with your sales representative for more options.
