

# Bobcat T650

## Compact Track Loader

### Rubber Track Options

#### RT\_3 C-Shaped

The c-shaped pattern provides more of an aggressive bite than the staggered pad. It has optimal floatation and traction with better results on hills or slopes.

#### RT\_4 Staggered Block Pad

The staggered block pad design creates a highly versatile track with good balance and traction. The design also minimizes vibration by putting more rubber on the travelling surface which spreads the weight load while increasing floatation.

#### RT\_44

This track is used when work demands driving long distances. Low vibration and noise. Exceptional for rider comfort.

#### RT\_53

This staggered tread pattern is more durable and aggressive when compared to the other tracks for the Bobcat T650.

#### RT\_55

This block pad design creates a very versatile track with good balance and traction. It minimizes vibration by putting more rubber on the travelling surface, which spreads the weight load while increasing floatation.
