

Case 445 CT & 450 CT

Compact Track Loader

Rubber Track Options

RT_1 Premium Style

This tread provides aggressive traction and floatation for maximum pushing power and is ideal for almost any application.

RT_3 C-Shaped

The c-shaped pattern provides more of an aggressive bite than the staggered pad. It has optimal floatation and traction with better results on hills or slopes.

RT_4 Staggered Block Pad

The staggered block pad design creates a highly versatile track with good balance and traction. The design also minimizes vibration by putting more rubber on the travelling surface which spreads the weight load while increasing floatation.
