

John Deere CT322 & CT332

Compact Track Loader

Rubber Track Options

RT_4

RT_38

RT_55

RT_4 Staggered Block Pad

The staggered block pad design creates a highly versatile track with good balance and traction. The design also minimizes vibration by putting more rubber on the travelling surface which spreads the weight load while increasing flotation.

RT_38 Straight Bar

The most aggressive tread pattern for the John Deere CT322 & CT332 is the straight bar. This track has great results in mud and snow. It is used in application where traction is much more important than the ground left behind.

RT_55 "H" Pattern

The block pad design creates a very versatile track with good balance and traction. It minimizes vibration by putting more rubber on the travelling surface, which spreads the weight load while increasing flotation.

Check with your sales representative for more options.
